The world is too fast. We no longer spend more than 5 minutes without checking our phones. Timings, agenda, schedules and deadlines suffocate us. **MUTE will be a button that, when turned on, leaves it all behind.**

Mute is a way of life that deals with all these negative trends by simply turning them off.

More than silence, mute is focus.

Mute is a slow down button.

When getting into MUTE mode, we slow down our life. **And we focus on ourselves and on what really matters.**

Mute is to mentally stop.

Because in mute the mind rests. Even when the body doesn't.

03. What's mute?

A photograph of a brown paper bag with embossed text. The bag is positioned in the lower right corner of the frame, set against a clear blue sky. The text on the bag is arranged in two lines: "sound on" on the top line and "noise off" on the bottom line. The bag's surface is textured, and the lighting creates shadows that emphasize the embossed nature of the text.
